

# Project Scribe

## Sprint 1 Summary

**Sprint 1 Completion:** 100%

**Total Project Completion:** 14.54/100%

### Progress Update

Our first sprint focused on completing the *planning and design* phase of our project that started around two weeks ago. This involved the following tasks:

- Finalizing the mockups & wireframes
- Creating the system flowchart
- Determining the technology stack
  - Angular
  - PHP
  - MySQL
- Setting up the domain and web host
- Configuring our GitHub repository
- Designing the system style and guidelines
- Designing the database schema and ERD
- Setting up the testing environment
- Creating a mini-prototype of the app
- Preparing the test matrix

### Sprint Retrospective

- What went well: For this sprint, we've accomplished all of the tasks needed and even started the development of some of the components of our app.
- What could be improved: For now, we haven't encountered any roadblocks that impede our project yet.
- What needs to be done: For our next sprint, we will begin the front-end development of our project. This involves developing the components for the authentication and the core app.
